-----

Dear SourceForge.net User,

As we enter a new calendar year, our focus remains on further improving the quality of our service. To that end, I am pleased to announce that SourceForge.net will offer Subversion in early January 2006, initially as a beta program available to approximately 50 projects. Then, if the Subversion beta period proceeds as smoothly as we expect, we will deploy Subversion site wide by March, 2006.

Going forward we intend to support both CVS and Subversion, thereby offering the two version control systems most widely used in the Open Source community.

In addition to our Service Operations Team's progress regarding our Subversion offering, I am also pleased to report that our Enhancement Team and Product Management continue to make significant progress on our upcoming redesigns of search and the software map. I'll provide details next month.

Thank you once again for your continued support. The SourceForge.net team wishes each of you a healthy and happy 2006.

Jay Seirmarco  
General Manager, SourceForge.net  
[jay@sf.net](mailto:jay@sf.net)

#### SourceForge.net Subscriptions - Free T-shirt

-----

SF.net subscribers receive a full array of exciting features, including priority technical support. We have extended our offer for a free T-shirt from ThinkGeek.com when you sign up for an annual SourceForge.net subscription.
